Subject: Statement with respect to BRCS4-certification Prins Transport B.V.

To whom this may concern,

On 15 and 16 November 2023 a re-certification audit against the BRCS4-standard was performed by SGS at Prins Transport B.V. located at Lekkerkerk, The Netherlands.

The audit was performed within the pre-described audit period and should normally already have resulted in the reconfirmation of the certification and issuing of a new certificate.

Due to delay in the reporting process, that is not related to the audit findings, the review has not been finalized yet.

With this statement we would like to stress that the delay and the fact a new certificate has not been issued yet is not in any way related to the audit findings or the status of products and processed as evaluated during the audit. Therefore, confidence may be retained in the services supplied by the company in the period between the expiry of the previous certificate and the issuance of a new certificate.

Yours sincerely,
SGS Nederland B.V.
